

**Property Worksheet**  
**Pompton Lakes Works Site Vapor Intrusion Program**

**Property Address:** \_\_\_\_\_

Relevant activities completed at your property to date:

1. Is your property located within the revised boundary based on the 2013 NJDEP Ground Water Vapor Intrusion Screening Levels? (see map)	
2. <u>Sub-Slab Soil Gas</u> – Has pre-installation sub-slab soil gas data been collected? If yes, do concentrations of site-related constituents of concern exceed March 2013 NJDEP sub-slab soil gas screening levels?	
3. <u>Indoor Air</u> – Has pre-installation indoor air data been collected during the heating season? If yes, do concentrations of site-related constituents of concern exceed March 2013 NJDEP indoor air screening levels?	
4. Has a sub-slab depressurization system been installed to eliminate the vapor pathway?	
5. Is long-term monitoring of indoor air being completed for continued assessment of the vapor pathway?	

**Based on the activities listed above, the options available to you are listed below. Please see the next attachment which provides you with detailed descriptions of those options should you choose to take an action (not required).**
